

STEREO MOC Status Report
Time Period: 2008:273 - 2008:279

STEREO Ahead (STA) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. Ahead spacecraft performance continues to be very good with all subsystems performing nominally. The following spacecraft/instrument events occurred during this week:

- On day 274, a SECCHI stepped calibration at the aphelion/perihelion midpoint was executed.
- The average daily SSR playback volume for Ahead was 7.1 Gbits during this week.

STEREO Behind (STB) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. Behind spacecraft performance continues to be very good with all subsystems performing nominally. The following spacecraft/instrument events occurred during this week:

- On days 275 and 277, supported IMPACT real-time commanding to set SEPT thresholds.
- The average daily SSR playback volume for Behind was 6.2 Gbits during this week.
